

The support from the Invermere Health Care Auxiliary Society has helped me reach my post-secondary goals as a young learner in the health-care system. Their generosity towards students and our future health-care providers allows us to pursue our passion in school while knowing that we receive encouragement from back home.

I have also attached a photo of myself from my white coat ceremony last year in this e-mail.

I just wanted to thank you again to you and the IHCAS for your support again this year. It truly has been appreciated from my family and I. This summer I am hoping to be back in the valley working at one of the offices as part of the summer student practitioner program and I am beyond excited to be one step closer to being done dental school.

Enjoy your holidays,
